

# TIP TUESDAY

A weekly guide to help you  
kick your plastic habits.

## Tip Tuesday Plastic Free Bathroom

Reducing a plastic footprint starts at the smallest levels during a daily routine. Begin the moment you wake up and prepare for the day. The bathroom offers a place to replace plastic items with alternative solutions and start each day looking fresh and plastic-free!

### MICROBEADS

Products containing microbeads (the small plastic pieces found in a variety of bathroom facial scrubs and exfoliants) will be sold in the US until 2018.

**What do you do if you have products that currently contain microbeads (polyethylene or polypropylene)?**

- a) Throw them in the trash
- b) Empty contents in the drain and recycle container
- c) Empty contents into the trash and recycle container
- d) None of the above

**Pearly Whites:** Use a bamboo or metal toothbrush and a stainless steel tongue scraper. When you are finished with your bamboo toothbrush, soak the brush in water to release the bristles and compost the handle.

**Smooth Skin:** Shave with metal razors (non-slip for women can be a life-saver!).

**Make Bubbles:** Replace plastic loofahs with a sea sponge, biodegradable konjac sponge or wooden body brush.

**Switch to Bars:** Bar soap, bar shampoo and bar shaving cream come wrapped in twine or recycled paper and stay plastic-free when you store them on

squares of bamboo.

**Storage Ideas:** Consider bamboo, wood and basket storage ideas for bathroom items to cut down on plastic containers/holders.

**Bath Mat Alternatives:** Try rubber, bamboo or even hand towels as bath mats instead of PVC and plastic mats.

**Cover Your Shower:** Hemp, Cotton and Linen are good alternatives to vinyl and plastic shower curtains - for the DIY take an old bed sheet and cover it with beeswax - this is a natural water repellent. Re-purpose

jewelry as shower-hooks to hang your new curtain!

## MICROBEADS

**What do you do if you have products that currently contain microbeads (polyethylene or polypropylene)?**
